About Resendem

Project Resendem is organized by UMR IRICE (CRHI P. Griset) in association with the CEMMC of Université Bordeaux 3 (C. Bouneau et A. Fernandez), the UMR TRIANGLE (G.Pollet) and the UPR LCP (I. Veyrat-Masson).

Project Resendem takes a new look at the history of three fields – telephony, electricity, automobile – from the contemporary viewpoint of “technical democracy,” which, discussed and re-evaluated in light of complementary approaches, indeed support a reconsideration of networks structuring the everyday of European societies since the end of the nineteenth Century.
